PROFESSIONAL EXPERIENCE

Logiqon Islamabad, Pakistan
Senior Flutter Developer 2025 - Present

- Delivered multiple Flutter applications while managing **three concurrent projects**, consistently meeting aggressive deadlines. Stabilized and refactored poorly structured codebases, resolving architectural and state management issues to restore reliability
- Rescued high-risk deliveries through deep debugging and optimization, enabling **successful client demos that strengthened the company's negotiating position**. Maintained delivery velocity under pressure by prioritizing critical work and extending ownership during key release phases, converting unstable implementations into demo-ready, production-grade applications

CAS - Center for Advanced Solutions Bahawalpur, Pakistan
Android Developer Intern | Flutter Developer 2022 - 2025

- Delivered a feature-rich educational application that improved organizational efficiency by 15% by streamlining financial record management, strengthening attendance tracking, and implementing a robust authentication flow. Architected and integrated a **secure, scalable Firebase-based backend**, enabling real-time data synchronization and reliable data access across users
- Built responsive educational applications using XML-based UI components including RecyclerView, CardView, and ConstraintLayout while applying modern Android design principles.
- Integrated RESTful APIs using Retrofit for efficient data synchronization and backend communication

Professional Projects

AddMee/HelpMee Logiqon, Islamabad
<https://apps.apple.com/ee/app/addmee/id1566147650> 09/2025 - 12/2025

Led an end-to-end Flutter rewrite of a previously separate native Android (Kotlin) and iOS (UIKit/Swift) application, consolidating UI, state management, APIs, authentication, and NFC into a single, production-ready codebase using Clean Architecture with Bloc

- Reduced bugs, improved API performance, and lowered maintenance by consolidating ownership from two engineers to one
- Enabled faster feature parity and simplified iterations by eliminating cross-platform dependencies

Shopeedo(Multi-App Commerce Suite) Logiqon, Islamabad
[https://play.google.com/store/apps/developer?id=Shopeedo+\(PRIVATE\)+Limited](https://play.google.com/store/apps/developer?id=Shopeedo+(PRIVATE)+Limited) 07/2025 - Present

Rebuilt a **three-app Flutter e-commerce and food delivery system** (customer, rider, seller) by restructuring poorly written codebases into scalable MVC applications with Provider/ChangeNotifier. Implemented the complete ordering flow, real-time tracking, notifications, rider status updates, and Cash on Delivery and JazzCash payments in collaboration with a PHP Laravel backend, delivering production-ready, live applications

- Transformed an unstable system into a fully deployable, live platform enabling seamless coordination between customers, riders, and sellers
- Improved maintainability and delivery speed by enforcing a consistent architecture across all three applications

Caterbid Logiqon, Islamabad
<https://play.google.com/store/apps/details?id=com.logiqon.caterbid>

A marketplace application that simplifies catering bookings by enabling customers to submit event details and receive bids from top-tier local caterers. The platform supports menu comparison, transparent pricing, and secure in-app payments. Provided technical **mentorship and architectural guidance** to a junior developer, assisting in decision-making, problem-solving, and implementation strategy when required

CAS Elms CAS, Bahawalpur
<https://play.google.com/store/apps/details?id=pk.org.cas.ELMS>

CAS Elms is a full-featured educational platform empowering students with access to personal profiles, payment history, and activity progress tracking. It includes a real-time lecture module for seamless online learning, along with dedicated admin and owner dashboards for efficient operational management.

Skills

Mobile & App Development: Flutter Development • Dart • Android Development • Java • Swift

State Management: Bloc • Riverpod • Cubit • Provider • ChangeNotifier • GetX • Local State Management

Payments & Security: SafePay • JazzCash • Stripe

Skills

Backend & Integrations:

Firebase · Supabase · Restful APIs · NFC Integration & Management · Sqlite · Storage mechanisms · Data storage · Version control · CI/CD · Release management

Language: Urdu (Native) · English (Proficient)

Education

The Islamia University of Bahawalpur

Bahawalpur, Pakistan

Bachelor's Degree in Software Engineering | GPA: **3.87** / 4.0
